LOCUS
LOCUS
DEFINITION DNA encoding VL region of human monoclonal antibody that
Specifically acts against lung cancer cell,breast cancer
cell,stomach cancer cell and colon cancer cell,but not against
normal fibroblast.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                            193 agtigatotigagacagatttoactotoaccatoagcagtotigcaacotigaagattttigca 252

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution

resistant) primer*M13RP1 Rsitel=Not I Rsite2=Eco FI Adult human. Ist strand CDNA was primed with a Not I - Olgo(dI) primer [5' TGTIAC7AROIG5AA3C95C9A5C9CIIIIIIIIIIIIIIIIII 3'). double-stranded cDNA was ligated to Eco EI adaptors (Phaimacia). digested with Not I and cloned into the Not I and Eco PI sites of a modified prif3 vector (Pharmacia). Library went through one round of normalization to a Cot = 20; Library constructed by Pento Soares and M.Patima Bonaldo.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    DEFINITION 9)75f04.rl Home captens cond clone 154591 5' similar to gb:X17115 accession calls.

Listing first 45 summaries

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Mean 7.705; Variance 4 193; scale 1 838
